

## Product Data Sheet

# DB950

## 950 Series Standard Base

### General

---

The DB950 is an addressable fire detector base including a passive address card. It is designed to allow the detector to be fitted without the need for any force. It has a "one-way only" fit. A unique, patented addressing method provides simple, user-friendly and accurate identification of detector location whereby a coded card, inserted in the base, is read by any detector as it is plugged in.

### Variants

---

As an alternative, this detector base is also available in BLACK with the same features (DB950B).

### Standard Features

---

- Passive base address
- Electronic free base
- Programmable slide-in address card
- Compatible with 950 and 990 series detectors
- Full line device line consisting of ionisation, optical, temperature, multi sensors, manual call points and multiple I/O units
- Aesthetic design
- EN54, BOSEC, VdS, and CNBOP approved

# DB950

## 950 Series Standard Base
